To Whom It May Concern,

777 Demolition Ltd

I have had the pleasure of Using 777 Demolition for a wide variety of Demolition projects over the past five years and have always found them to be thoroughly professional and helpful in their execution of the contracts awarded.

We have together managed demolition schemes of a grand scale (Holmethorpe Quarry in Surrey, a 64 acre ex sand quarry and associated plant and buildings) down to standard small demolition projects.

They have always remained competitive, non contractual and keen to resolve all issues concerning their works with excellent back up for the specialist services sometimes required for demolition.

We are now to embark on site waste management of my schemes together, which again has been priced very competitively.

The office staff remains helpful, available and not to distant from the contracts they administrate.

I have no hesitation in recommending their services to you for Demolition works of any magnitude or specialist help/advise on disposal of specialist wastes.

Yours Sincerely

Roger Synnuck
Construction Director
